Professional Summary

Full-stack Engineer (3 yrs) specializing in 0-1 product development, cloud-native architectures, and large-scale data pipelines. Shipped revenue-generating platforms (₹800k in 18 days) and run an Agentic-AI SDLC that cut planning-to-PR time 60%.

Education

Indian Institute of Information Technology (IIIT) Tiruchirappalli, TN, India
B.Tech in Computer Science and Engineering; CGPA: 8.3 2019 – 2023

Technical Skills

- **Backend & Cloud:** Node.js, Express, FastAPI, Hexagonal Architecture, AWS (EKS, Glue, Lambda, S3), Python, Java, SQL, C++, Prisma ORM, Knex.js, CI/CD, Supabase, Redis.
- **Agentic AI:** Cursor agents, Claude Code, Agentic Planning, MCPs (GitHub, Figma, Browser, Coda).
- **Web/Frontend:** Next.js, React Flow, React, Ionic React, Tailwind CSS, JavaScript/TypeScript.
- **Tools & Mobile Development:** Git, Docker, Azure DevOps, Postman, Android Studio, XCode, Firebase, OpenCV.

Experience

- **Fresh Gravity** Pune, MH, India
Consultant, Data Management Mar 2026 – Present
 - Designed and implemented a backend module to extract tightly-coupled validation rules into standalone, reusable entities — eliminating duplication across study configurations.
 - Implemented audit logging across a legacy backend to enable full traceability of data changes.
- **nRev.ai** Pune, MH, India
Software Engineer Jan 2025 – Mar 2026
 - Architected Python services using Hexagonal Architecture to decouple core logic from external adapters.
 - Orchestrated AWS Glue ETL pipelines processing 4TB compressed global LinkedIn datasets into S3 with optimal cost-efficiency (\$250 cost inclusive of trials and experimentation).
 - Built complex UI visualizations using React Flow in Next.js .
 - Managed AWS EKS and CI/CD pipelines; integrated Slack Alerting with CloudWatch logs.
 - Pioneered Agentic SDLC workflows using MCPs, Cursor Agents, and Claude Code, achieving a 60% increase in development velocity from planning to PR reviews.
- **Betacrew Solutions Private Limited** Mumbai, MH, India (Remote)
Software Engineer Sep 2023 – Jan 2025
 - Built a 0→1 full-stack platform generating 800k INR in 18 days.
 - Developed backend (Node/Express + PostgreSQL), frontend (React + Ionic) and mobile apps (iOS, Android).
 - Planned product features, designed database schemas, and managed releases across Web, Android, and iOS.
- **basys.ai** Boston, MA, USA (Remote)
Mobile Developer May 2022 – Aug 2022
 - Developed two Android apps (Java) and implemented OpenCV models for Diabetic Retinopathy detection.

Personal Projects

- **Rupiverse — Personal Finance Management** Jun 2026 – Present
Work-in-progress Open source project
 - A multi-user expense platform with hierarchical category trees.
 - Engineered a cached-balance architecture with a nightly self-healing reconciliation job — avoids expensive on-read aggregation while guaranteeing correctness.
 - Use a locally-hosted 3B Ollama LLM for transaction categorization, keeping inference cost at zero and user financial data fully private.

- **Todogenix Smart Voice Assistant**
Devpost

Dec 2020

- Won 1st place at the Hackathon for an innovative task management app and seamless voice-reminders.

Achievements & Certifications

- **Hackathons:** Won 4 hackathons; organized IIIT Trichy's first hackathon to promote "Learn By Doing".
- **Certifications:** Hack The League Certificate, Android Certification.
- **Science Workshop:** First Prize in Science Workshop 2019 at IIIT Trichy for LiFi model demonstration.
