Professional Summary

Software Engineer (3 yrs) building full-stack products with React, Node.js and Python. Built a fitness platform end to end that hit 5,000 users and INR 8,00,000 revenue in 18 days, and now serves 1M+ users across 1,000+ cities. Deep hands-on experience with agentic development infrastructure — MCP servers, agent planning loops, Cursor and Claude Code — cutting planning-to-PR time 60%.

Education

Indian Institute of Information Technology (IIIT) Tiruchirappalli, TN, India
B.Tech in Computer Science and Engineering; CGPA: 8.3 2019 – 2023

Technical Skills

- **Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind, Ionic, React Flow.
- **Backend & APIs:** Node.js, Express, PostgreSQL, SQL, Python, FastAPI, Docker, CI/CD.
- **AWS & Data:** Lambda, Step Functions, AWS Glue, S3, IAM, Parquet, PySpark.
- **AI & Agent Tooling:** MCPs (GitHub, Figma, Browser, Coda), Agentic Planning, Cursor, Claude Code.

Experience

- **Fresh Gravity** Pune, MH, India
Software Engineer Mar 2026 – Present
 - Designed a backend module centralizing data validation rules into standalone, reusable entities — enforcing consistent data quality standards across clinical study configurations and eliminating duplication.
 - Implemented audit logging across a legacy backend, enabling full data traceability and auditability for regulated clinical-trials data in a B2B SaaS product.
- **nRev.ai** Pune, MH, India
Software Engineer Jan 2025 – Mar 2026
 - Built interactive data-relationship visualizations in Next.js and TypeScript using React Flow — custom node and edge types, layout, and interaction handling — giving stakeholders visibility into complex data lineage.
 - Cut processing cost for a 4TB external dataset to \$250 total compute by optimizing PySpark-based AWS Glue pipelines into a consistent Parquet model on S3 — including partitioning strategy and IAM configuration for service access.
 - Architected Python services using Hexagonal Architecture to decouple core logic from external adapters for the B2B SaaS product.
 - Pioneered Agentic SDLC workflows using MCPs, Cursor Agents, and Claude Code, achieving a 60% increase in development velocity from planning to PR reviews.
- **Betacrew Solutions Private Limited** Mumbai, MH, India (Remote)
Software Engineer Sep 2023 – Jan 2025
 - Built an entire fitness platform end to end as sole engineer — backend (Node/Express + PostgreSQL), web (React + Ionic), and native iOS/Android apps — covering six fitness device integrations (Fitbit, Google Fit, Garmin, Apple Health, Strava, Health Connect), live leaderboards, payment gateway, physical reward fulfilment, and an admin dashboard. App links - ([iOS](#), [Android](#)).
 - Reached 5,000+ users and INR 8,00,000 revenue within 18 days of launch; now serves 1M+ users across 1,000+ cities in India and abroad, with 100k+ Play Store installs.
 - Hardened the platform post-launch as traffic scaled, improving query performance and data integrity under concurrent load.
 - Owned feature planning, database schema design, and release management across Web, Android, and iOS.

Achievements

- **Hackathons:** Won 4 hackathons; organized IIIT Trichy's first hackathon to promote "Learn By Doing".
